“I believe that applying to study at DCCC was one of the best and most rewarding decisions I have made in my life. I have made a lot of friends who I still talk to after going back home to Germany. I always got help and felt welcomed at the International student office, and I gained an enormous amount of knowledge during my two years of studying. I had great professors and learned a lot from them. For instance, I could never have thought that statistics could be fun and it was. I am especially grateful for the all the English classes, where I learned the grammar and articulation of the English language.”

“Before starting the first semester, I was worried about the language barrier. But my worry disappeared because all my professors were concerned and taught me with examples that I could understand. They also gave me more personal attention. I knew the information, but I was worried that I couldn’t express it. The professors were patient, they listened, and they gave me time to express that knowledge. If you work hard, the professor will know that you are working hard. They will try to take better care of you. Our school can help you to achieve your dreams.”

Not only does it have a group of great and friendly staff members who will help you every step of the way during your education and during the transfer process, but also the various clubs and activities on campus will prepare you for the campus life that awaits you in a bigger university.
